emergency.			
<ul> <li>Delegations of authority and succession plans.</li> </ul>			
<ul> <li>How the OPO has included/addressed all of the</li> </ul>			
hospitals with which it has agreements into its			
emergency plan.			
• Verify that all of the above are included in the written			
emergency plan.			
Leadership can describe their process for ensuring cooperation			
and collaboration with local, tribal, regional, State, and Federal			
emergency preparedness officials' efforts to ensure an			
integrated response during a disaster or emergency situation.			
There is documentation of the facility's efforts to contact such			
officials and, when applicable, its participation in collaborative			
and cooperative planning efforts. For ESRD facilities: There is documentation that the ESRD			
facility contacted the local public health and emergency			
management agency public official at least annually to confirm			
that the agency is aware of the ESRD facility's needs in the			
event of an emergency and know how to contact the agencies			
in the event of an emergency.

The plan lists the location(s) and use of fire alarms. Staff			
members can describe the facility's current procedure for			
containing fires.			
For CORF: The CORF and associated Clinics, Rehabilitation			
Agencies, and Public Health Agencies as Providers of			
Outpatient Physical Therapy and Speech-Language Pathology			
Services collaborate with fire, safety and other appropriate			
experts to develop and maintain its emergency plan. The			
collaboration is documented .			
For Transplant Centers: Verify the hospital has written			
documentation to demonstrate that a representative of each			
transplant center participated in the development of the			
emergency program. There is documentation of emergency			
protocols that address transplant protocols that include the			
hospital, the transplant center and the associated OPOs.			
The written policies and procedures which address the facility's			
emergency plan indicate (Does not apply to Transplant			
Centers):			
<ul> <li>Policies and procedures were developed based on the</li> </ul>			
facility- and community-based risk assessment and			
communication plan, utilizing an all-hazards approach.			
<ul> <li>policies and procedures have been reviewed and</li> </ul>			
updated on an annual basis.			
For Transplant Centers: Mutually agreed upon written			
protocols address the duties and responsibilities of the			
transplant center, the hospital in which the transplant center is			
operated, and the designated OPO.			
The emergency plan includes:			
<ul> <li>Policies and procedures for the provision of</li> </ul>			
subsistence needs including, but not limited to, food,			
water and pharmaceutical supplies for patients and			
staff.			
<ul> <li>Policies and procedures to ensure adequate alternate</li> </ul>			
energy sources, including emergency power necessary			
to maintain:			
<ul> <li>Temperatures to protect patient health and</li> </ul>			
safety and for the safe and sanitary storage of			
provisions.			
• Emergency lighting.			
<ul> <li>Fire detection, extinguishing, and alarm</li> </ul>			
systems.			
<ul> <li>Policies and procedures to provide for sewage and waste dispesal</li> </ul>			
waste disposal.

(These requirements do not apply to ASCs, Outpatient Hospice Providers, Transplant Centers, HHA, CORFs, CMHCs, RHCs/FQHCs, ESRD facilities.)			
For Hospices: The emergency plan includes policies and			
procedures for following up with staff and patients. Staff			
members/leadership can explain the procedures in place in the			
event they are unable to contact a staff member or patient.			
For HHA: Each patient's medical record has an individualized			
emergency plan documented as part of the patient's			
comprehensive assessment.			
<b>For Hospitals and CAH:</b> Staff can describe and/or demonstrate			
the tracking system used to document locations of sheltered patients and staff. The tracking system is documented as part			
of the facilities' emergency plan policies and procedures.			
For Hospice (homebound), PACE and HHAs: The emergency			
plan includes procedures to inform State and local emergency			
preparedness officials about patients in need of evacuation			
from their residences due to an emergency situation based on			
the patient's medical and psychiatric condition and home			
environment.			
The emergency plan includes policies and procedures for safe			
evacuation from the facility and that it includes:			
Consideration of care and treatment needs of evacuees			
Staff responsibilities			
Transportation			
<ul> <li>Identification of evacuation location(s)</li> </ul>			
Primary and alternate means of communication with			
external sources of assistance.			
For HHA: The emergency plan includes procedures to			
followup with staff and patients and to inform state and local			
authorities when they are unable to contact any of them.			
<b>For HHA:</b> There are procedures in the emergency plan to			
follow up with on-duty staff and patients to determine the services that are needed, in the event that there is an			
interruption in services during or due to an emergency.			
For HHA: There is a mechanism to inform State and local			
officials of any on duty staff or patients that they are unable to			
contact.			
The emergency plan includes policies and procedures for how			
the organization will provide a means to shelter in place for			
patients, staff and volunteers who remain in a facility.			
There are policies and procedures that the facility has	İ		
developed to preserve patient (or potential and actual donor			
for OPOs) information, protects confidentiality of patient (or

		MET	
potential and actual donor for OPOs) information, and secures			
and maintains availability of records.			
There are policies and procedures for the use of volunteers and			
other staffing strategies in the emergency plan.			
There are arrangements and/or agreements with other facilities to receive patients in the event the facility is not able			
to care for them during an emergency. This includes			
arrangements for transportation in the event of an evacuation.			
There are policies and procedures in the emergency plan			
describing the facility's role in providing care and treatment at			
alternate care sites under an 1135 waiver. <b>(Does not apply to</b>			
Transplant Centers, HHAs, CORFs, Clinics, Rehabilitation			
Agencies and Public Health Agencies as Providers of			
Outpatient Physical Therapy and Speech-Language Pathology			
Services, OPOs, RHCs/FQHCs.)			
The ESRD facility has included in its emergency plan, policies			
and procedures for obtaining emergency medical assistance			
when needed.			
The dialysis facility has a process in place where its staff can			
confirm that emergency equipment is on the premises and			
immediately available. Verify:			
• The process includes at least the listed emergency			
equipment within the emergency plan by asking to see			
a copy of the written processes/ policy on emergency			
equipment and medications.			
All of the above equipment is available and in working			
order.			
• There are procedures/checklist for ensuring equipment			
is checked			
• All emergency drugs are not out of date.			
COMMUNICATIONS PLAN			
There is a written communication plan that has been reviewed			
(and updated as necessary) on an annual basis.			
All required contacts included in the communication plan			
includes contact information. All contact information has been			
reviewed and updated at least annually.			
The communication plan includes primary and alternate means			
for communicating with facility staff, Federal, State, tribal,			
regional and local emergency management agencies. The plan			
includes listing the communications equipment or			
communication systems to be used.			
Verify the communication plan includes:			
A method for sharing information and medical (or for			
RNHCIs (Religious Nonmedical Health Care

INDICATOR	MET	NOT MET	COMMENTS
<ul> <li>Institutions) only, care) documentation for patients under the facility's care, as necessary, with other health (or care for RNHCIs) providers to maintain the continuity of care.</li> <li>For RNCHIs, the method for sharing patient information is based on a requirement for the written election statement made by the patient or his or her legal representative.</li> <li>Policies and procedures that address the means the facility will use to release patient information to include the general condition and location of patients.</li> </ul>			
The communication plan includes a means of providing information about the facility's needs, and its ability to provide assistance, to the authority having jurisdiction, the Incident Command Center, or designee. For hospitals, CAHs, RNHCIs, inpatient hospices, PRTFs, LTC facilities, and ICF/IIDs: The communication plan includes a means of providing information about their occupancy.			
For LTC AND IICF ONLY: Staff can demonstrate the method the facility has developed for sharing the emergency plan with residents or clients and their families or representatives. There is evidence that residents or clients and their families or representatives have been given information regarding the facility's emergency plan. The communication plan includes a method for sharing information from the emergency plan, and that the facility has determined it is appropriate with residents or clients and their families or representatives by reviewing the plan.			
TRAINING AND TESTING PROGRAM			
<ul> <li>There is a written training and testing program. For ESRD</li> <li>facilities: There is a patient orientation program. The program is reviewed and updated on an annual basis. For</li> <li>ICF/IID: Emergency plans meet the requirements for evacuation drills and training.</li> <li>Staff have knowledge of emergency procedures as outlined in the organization's EM training program Staff have received initial and annual emergency preparedness training.</li> <li>For ESRD: Staff can describe the evacuation procedures and plan. All patient care staff are current in CPR certification.</li> <li>There is documentation of the annual tabletop and full scale exercises (which may include, but is not limited to, the exercise</li> </ul>			
exercises (which may include, but is not limited to, the exercise plan, the AAR, and any additional documentation used by the facility to support the exercise. There is documentation of the facility's efforts to identify a full-scale community based exercise if they did not participate in one (i.e. date and ©Courtemanche & Associates			Updated 8/2023

		MET	
personnel and agencies contacted and the reasons for the			
inability to participate in a community based exercise). There is			
evidence of the facility's analysis of the exercises and response			
and how the facility updated its emergency program based on			
this analysis.			
For ESRD facilities: There is evidence the organization has			
implemented their policies and procedures and are actively providing orientation and training of all their patients for the			
emergency preparedness program. Patients can describe their			
orientation to the facility in terms of emergency protocols and			
procedures.			
EMERGENCY POWER SYSTEMS	I		
For Hospital, CAH, and LTC: The required emergency and			
standby power systems to meet the requirements of the			
facility's emergency plan and corresponding policies and			
procedures is in place which includes:			
• The emergency plan the facility has emergency power			
systems or plans in place to maintain safe operations			
while sheltering in place and/or during evacuation.			
<ul> <li>For hospitals, CAHs and LTC facilities which are</li> </ul>			
under construction or have existing buildings being			
renovated: The facility has a written plan to relocate			
the emergency power supply system by the time			
construction is completed			
• For hospitals, CAHs and LTC facilities with			
permanently attached generators: (New			
construction that takes place between November 15,			
2016 and is completed by November 15, 2017) The			
generator is located and installed in accordance with			
NFPA 110 and NFPA 99.			
• The hospitals, CAHs and LTC facilities with an onsite			
fuel source: The organization maintains the fuel			
source in accordance with NFPA 110 for their			
generator and has a plan for how to keep the			
generator operational during an emergency, unless			
they plan to evacuate.			
HEALTHCARE SYSTEMS			
The facility has determined and documented whether or not			
they have opted to be part of its healthcare system's unified			
and integrated emergency preparedness program:			
• There is documentation that verifies the facility within			
the system was actively involved in the development of			
the unified emergency preparedness program.
